CABLE PROTECTION SYSTEM

Vos Prodect Innovations B.V. is a specialist in design and supply of subsea cable protection systems and accessories. Cable protection system has initially been developed in 2003, optimized in 2010 and is extensively tested against the requirements of power and telecom cable installation projects. Vos Prodect Innovations has delivered over 15.000 meters of articulated pipes within the last 6 years.

+ PRO-CPS CABLE PROTECTION SYSTEM

Vos Prodict Innovations is a specialist in design and supply of ductile cast iron articulated pipes used for protection and stabilization of subsea power and telecom cables. Pro-CPS are well tested & proven products providing: strong & reliable interlocking mechanism, bend restriction, impact strength and a straight forward assembly.

The PRO-CPS are now used for 12 years and all protected cables are still in working order. The Ductile Cast Iron pipes are certified with chemical and mechanical properties and are fully traceable. All products are manufactured at foundries or manufacturing plants which are ISO certified.

+ FEATURES

- Split Design - Ductile cast iron half shells
- Easy handling and fast assembly
- Well tested strong locking mechanism - Do not require bolting!
- Built in bend restriction
- Increase of dynamic stability by means of added weight for high energy locations
- Avoids abrasion of the cable
- Protection in free span areas
- Supports rock dumping
- Environment friendly - No special permits required
- Decommissioning is possible together with the cable
- No fatigue in dynamic environment throughout the life time
